

# L'EROEI DELLE FONTI ENERGETICHE PRIMARIE E SECONDARIE

Fonti esauribili	min	max	note		min	max	note
Petrolio							Energia onde, maree e correnti marine
Metano							
Carbone							Risparmio energetico
Nucleare							<b>Vettori rinnovabili</b>
Sabbie bituminose							Gassificazione biomassa
<b>Fonti rinnovabili</b>							Bioetanolo da:
Idroelettrico							• cereali-barbabietole-leguminose
Eolico							• canna da zucchero
Geotermico							• cellulosa
Fotovoltaico							• gassificazione
Termosolare riscald.							Olio vegetale da oleaginose
Solare termodinamico							Biodiesel
Biomasse solide							Olio da microalghe
Impianti biogas
